Summary

Full Stack Developer (JavaScript, PHP, Node.JS, React) with 10+ years of experience working for diverse B2G & B2B clients in Transportation & E-Commerce. Significantly increased operational effectiveness of clients through automation. Worked as part of an Agile team of 7.

Goal: Full Stack Software Developer | JavaScript, TypeScript, PHP, Node.JS, React.JS, Next.JS

Skills & Competencies

Languages	English (fluent), Spanish (native)
Hard Skills	PHP, HTML, CSS, SCSS, JavaScript, JAVA, C#, Ruby, NodeJS, React, Android, Laravel, Symphony, Bootstrap, Material UI, Ruby on Rails, MySQL, MongoDB, Azure Table Storage, GIT, Composer, Yarn, Agile, Scrum
Soft Skills	Complex Problem Solving, Creativity, Logical Thinking, Agile Mindset, Teamwork

Experience

Sep. 2023 – Oct. 2025   **Full-stack Developer**

PSH, Buenos Aires, Argentina, https://wearepsh.com/

- Creation and maintenance of Microservices (NestJS, MySQL) and Microfrontends (React 18)
- Maintenance and update of PHP-based services
- Integration of different Microfrontends and their components
- Maintenance of an internal component library for company-wide use
- Bug fixing

Technologies: React, TypeScript, NestJS, MySQL, PHP, YAML

Mar. 2021 – Jun 2023   **Full-stack Developer**

BairesDev (International software developing & IT-outsourcing provider), Buenos Aires, Argentina, https://www.bairesdev.com

- Moved code from Slim templates (Ruby on Rails) to React for the client *Repair Pal* (*will need an USA IP to access the site, but VPNs work)
- Fixed bugs & created reports for possible performance solutions, created new React Components
- Worked in Agile teams up to 5

Technologies: React, Ruby on Rails, React on Rails, Slim-Lang, Next.js, TypeScript

Mar. 2020 – Mar. 2021   **Full-stack Developer**

Southworks S.A. (software solutions based on Azure using C# and APS.NET Core & tools for internal use with Node JS, React, Azure Table Storage (initially MongoDB) & Express, Buenos Aires, Argentina

- Developed a Speech translator with Azure Blob Storage (POC) incl. storage of conversations, original audios & translations to enable speaking in multiple languages at the same time
- Programmed a service with a simple interface to store the needed files with custom information (transcription & translation) using the metadata that ABS stores
- Developed a custom solution (Web/Mobile Apps) for using Azure Active Directory (AAD) Business 2 Client (B2C) with Identity Providers (Facebook, Twitter, Google, Etc…)
- Put together a complete guide on how to use AADB2C to create an account with multiple IPs and its implementation with samples (unfortunately the repository is still private)
- Developed several internal tools to measure the performance of development teams, did regular bug fixes & performance optimizations
- Worked in an Agile team of 6

Technology: GitHub, Git, C#, Node, React, Android, Java, JSON, JavaScript, Apache Cordova, Ionic, ES6, Node.js, Typescript

Aug. 2019 – Mar. 2020   **Backend Developer**

Servicios Computables S.A. (B2G IT solutions), Buenos Aires, Argentina

Governmental App to Control State of the Vehicles & Conduct Ticket Control Remotely

- Developed backend in Symfony & Laravel for the governmental app in a team of 4 developers
- Automated routines using MySQL triggers, stored procedures & events
- Developed a shift generator procedure in MySQL, considering non-working days & variable interval according to need, reducing operational time from 2 to 5 minutes to 2 to 5 seconds (according to different variables)
- Developed image generator for tickets to print logos & barcodes
- Created the necessary entities, controllers, and services, along with the unit tests
- Implemented ticket printing as a JAVA middleware & a complex system of scripts for deployment onto the printing systems enabling to use printers over the network that was not prepared for that, saving money on printers' exchange

Technology: MySQL, GitLab, Git, Laravel, PHP, USB Printer on LAN, Java

Nov. 2014 – Feb. 2016,   **Junior Web Developer**
Mar. 2017- Aug. 2019

Gray Line Argentina (tourist services, wholesale and retail, several suppliers around the world), Buenos Aires, Argentina

Bulk Quotation and Sales System – a tool to process reservations & bills developed for internal use and scaled up to integrate with clients like *Aerolineas Argentinas*, *Garbarino Viajes* and *Despegar*

- Developed a tool to allow selling various product packages online with special rates, performing post-sale calculations & billing
- Developed features to easily contact suppliers & prepare itineraries, enhancing control over debits and credits
- Reduced the post-sale deal set up time, reduced the possibility of human error by automating manual processes

Technology: JavaScript, PHP, JSON, jQuery, XML, SVN, HTML5, MySQL, Web Services

Integrations with Diverse Providers

- Performed system integrations with various suppliers and customers (*TourCMS, Events Travel*), developed robots, automated tasks
- Developed a robot to scan Emails for common expressions for *Get Your Guide*, since they had no integration systems, only used Emails
- Performed an integration with the electronic billing system for *AFIP*, resulting in 200 % effectiveness improvement since invoices are generated and sent automatically
- Developed a system for the massive loading of invoices issued and received in the software *Régimen de Información de Compras y Ventas* (V1.00 Release 5)

Technology: PHP, JSON, XML, SVN, MySQL, Web Services

Co-developed

http://gl-tours.com/aerolineas/index.php

https://www.garbarinoviajes.com.ar/actividades (this site redirects to another server, the DNS are configured to the servers of GL-Tours)

Jun. 2016 – Mar. 2017   **Web Developer**

S.I.P. – Solutiones Informáticas Personalizadas (customised IT solutions, from web pages with own servers to applications & multiplatform systems for business use), Buenos Aires, Argentina

- Supported already developed sites, conducted minor fixes
- Developed https://www.piccadely.com.ar/ from scratch

Technology: JavaScript, PHP, JSON, jQuery, XML, HTML5, MySQL, Web Services

Jun. 2013 – Sep. 2016   **Freelance Web Developer**

- Optimised load times of websites, developed tools and functionalities
- Integrated *Mercadopago* and *Todo Pago* in http://trebo.com.ar

Technology: JavaScript, PHP, JSON, jQuery, XML, HTML5, MySQL, Web Services

Education

2018 – 2019	Courses on Java, Android, Mobile Hacking, Scrum, Git http://www.educationit.com
2020 – 2022	Microsoft Azure Certified (AZ-204)
2009 – 2012	Universidad Tecnológica Nacional, Buenos Aires, Argentina Unfinished Tertiary for Senior Programming Technician
2009	Instituto Técnico Industrial San Judas, Buenos Aires, Argentina Diploma of Personal and Industrial Computing Technician

09.12. 2021   Gabriel Scocozza
